My name is Max, I am 31 years old, and young father, I am from Ukraine! I want to work in a position Junior Quality Assurance Engineer. I studied at the Kyiv National Pedagogical University and received a master's degree in choreography and English. Now I work in the field of culture. Why do I want to work as a QA tester? The main reason, I like it! I like to catch bugs and help developers in creating a quality product. I also want to change my life, my professional life! Find new career opportunities. My first experience was when I was 16. I created a web page for one online game. It was fun and cool. Through for some time I was engaged in self-development, studied the JAVA programming language, where I created an ingenious program - a calculator. For me it was very powerful, but not enough to get started in programming.

Now I have completed Quality Assurance Engineer courses, gained practical skills in testing web and mobile apps, I understand the theory of testing, understand SDLC, STLC and role QA Engineer, understand client-server architecture. I have experience in creating test documentation, Checklist, Bug Report, Test Plan, Test Case. I understand the Bug Life Cycle. Experience in visiting UI \ UX testing. Have experience in functional, non-functional testing, black and gray box testing, security testing, have basic knowledge of SQL, HTML, CSS, API, Chrome DevTools, experience using bug-tracking system JIRA, GitLab, GitHub.

English B1 level. I learn quickly, and it will help to quickly become a good specialist, attentive to details, sedentary, I work in a team. I understand that I do not have enough practical experience, so I can prove, that I am a worthy specialist in the interview and complete a test task!.

I will be happy to join your team!

Best regards!
